#### Abstract

Clinch-On manufactures its cornerbead to meet a rigid set of specifications using top quality, corrosion-resistant, proprietary coated steel. Clinch-On warrants that its paper-faced tape-on cornerbead will not edge crack when applied to a sound structure built on a permanent foundation using Clinch-On recommended application techniques. Subject to use under normal conditions, Clinch-On paper-faced tape-on cornerbead is guaranteed for 30 years from the date of installation. Clinch-On shall not be responsible for any loss resulting from installation practices not in accordance with Clinch-On recommended application techniques; damage caused by contact with water during delivery or while stored at the job site; failure of the owner to maintain the building with reasonable care and abnormal conditions including abuse, neglect, catastrophe and intermittent or prolonged exposure to water. Clinch-On makes no warranties other than that which is explicitly stated herein.

Note: Special length cuts available upon request with ten (10) day advanced notice.

## 

## THE PAST 60 YEARS

In the early 1950s, Bob Larrabee began manufacturing cornerbead in Minneapolis, Minnesota and invented and patented the Original Clinch-On Cornerbead Tool. Bob and his wife Elaine were both born and raised in Minneapolis, but by the mid-1950s, Bob and Elaine were tired of the cold Minneapolis winters. So in 1957, Bob and Elaine moved to sunny California. With their station wagon pulling a trailer loaded with one cornerbead machine, Bob, Elaine and their two young daughters moved to Southern California.

In 1957, with only one cornerbead machine, Bob began manufacturing Clinch-On Cornerbead out of his garage in Torrance, California. In 1960, Bob built a manufacturing building on Parker Street in Orange, California and moved his Clinch-On Cornerbead manufacturing from Torrance. By 1969, Clinch-On outgrew its Parker Street location and Bob moved the Clinch-On Cornerbead manufacturing facility to Grove Avenue in Orange, California where it still remains today.

Clinch-On started with one building at the Grove Avenue address but now occupies five buildings. In addition to California, the Company now manufactures cornerbead in Charlotte, NC and distributes cornerbead from facilities in Atlanta, GA, Orlando, FL, and Charlotte, NC. From one cornerbead machine over 50 years ago, Clinch-On now owns a large variety of cornerbead machines and manufactures an awesome array of cornerbead profiles used by the drywall construction industry.

Clinch-On Cornerbead Company is the only cornerbead manufacturer in the United States that owns its own electro galvanizing coating line. This vertical integration provides Clinch-On with a greater degree of control over the quality of the coated steel that Clinch-On uses to manufacture its cornerbead.

From its humble beginnings in 1957 with one cornerbead machine, Clinch-On has grown into an industry leader thanks to the support received from the drywall distributors and contractors the company has had the privilege to serve.

Since its founding, the Clinch-On Cornerbead Company has remained privately owned.

## $\mathfrak{C l i n c t h}-\mathbb{O})^{2}$

## - To Our Drywall Distributors:

We sell only to drywall distributors. Many of our competitors will take customers away from the distributors by selling directly to contractors. When manufacturers skip the distributor and sell directly to the large drywall contractors, they create an unfair disadvantage for all other contractors. We sell ONLY to drywall distributors!

Our sales force calls on drywall contractors to obtain an understanding of their needs, to provide guidance on the use of our cornerbead products and to recommend that the drywall contractor purchase their drywall products from our distributors.

We manufacture a wide array of cornerbead profiles and maintain a large inventory so that our distributors' orders are complete and ready for will call and/or shipment within 24 hours. Our ready-on-demand production system allows our distributors to keep low inventories of our products and to maintain the high inventory turns preferred by their corporate officers.

## - To Our Drywall Contractors:

We engineer and manufacture our cornerbead with the objective of improving the proficiency and efficiency of the drywall contractors using our products.

Our manufacturing methods and our array of cornerbead profiles help our drywall contractors to reduce their labor installation cost and minimize the amount of joint compound used to install our cornerbead.

Our cornerbead nose design, bow design, mud adhesion and rust prevention coating increase the drywall contractors' efficiency and reduce their installation cost and their number of callbacks. The needs of drywall contractors drive our cornerbead engineering and manufacturing systems.

The full line of Clinch-On Cornerbead products is available exclusively through our network of distributors.

## 

## 1-1/4" $90^{\circ}$ SQUARE CORNERBEAD

To give you a superior joint compound adhesion and maximum protection for a professionally finished corner, Clinch-On manufactures its 1-1/4" standard flange $90^{\circ}$ square cornerbead with proprietary electro galvanized coated steel and a deep knurling (embossing). Our nose design requires less joint compound. Our 1-1/4" flange provides you with liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our proprietary electro galvanized steel coating gives our cornerbead a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel. Our $1-1 / 4^{\prime \prime} 90^{\circ}$ square cornerbead is designed for $90^{\circ}$ outside corners.

## 1-1/4" $135^{\circ}$ SQUARE CORNERBEAD

Clinch-On manufactures its $1-1 / 4^{\prime \prime}$ standard flange $135^{\circ}$ open angle square cornerbead with proprietary electro galvanized coated steel and a deep knurling (embossing) to give you a superior joint compound adhesion and maximum protection for a professionally finished drywall corner. Our nose design requires less joint compound. Our 1-1/4" flange provides you with liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our proprietary electro galvanized steel coating gives our cornerbead a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel. Our 1-1/4" $135^{\circ}$ square cornerbead is designed for $135^{\circ}$ outside corners.

## "L" SOUARE TRIM CORNERBEAD

Clinch-On "L" square cornerbead trim was designed to fulfill two drywall trim needs. First, our "L" square trim was designed for drywall that abuts a suspended ceiling and secondarily it was designed as a wood reveal for window and door jambs. Our "L" square trim can be used where drywall abuts suspended ceilings, plaster, beams, wood, masonry or concrete. Clinch-On manufactures "L" profiles for a wide variety of installation requirements ( $1 / 4^{\prime \prime}, 3 / 8 ", 1 / 2^{\prime \prime}, 5 / 8 ", 3 / 4^{\prime \prime}, 1^{\prime \prime}$ and $1-1 / 4^{\prime \prime}$ flanges). Our proprietary electro galvanized steel coating gives our " L " square trim a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel.

## 

## "J" SQUARE TRIM CORNERBEAD

Clinch-On " J " square trim cornerbead was designed to cap drywall for a professionally finished drywall edge. Clinch-On manufactures "J" square trim profiles for a wide variety of installation requirements ( $1 / 2^{\prime \prime}$ or $5 / 8$ " flanges). Our hemmed edge provides for a quick installation. For a smooth application, Clinch-On "J" square trim cornerbead does not contain any joint compound holes. For maximum protection Clinch-On manufactures its " J " square trim with its proprietary coated steel.

## "U" SOUARE TRIM CORNERBEAD

Clinch-On "U" square trim cornerbead was designed to cap drywall for a professionally finished drywall edge. Our " $U$ " square trim can be used where drywall abuts suspended ceilings, plaster, beams, wood, masonry or concrete. Clinch-On manufactures " $U$ " square trim profiles for a wide variety of installation requirements ( $1 / 2$ " or $5 / 8$ " flanges). Our proprietary electro galvanized steel coating gives our " U " square trim a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel.

## WIDE 7/8" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 1/2" RADIUS

Clinch-On manufactures $1 / 2^{\prime \prime}$ radius $7 / 8^{\prime \prime}$ wide flange $90^{\circ}$ bullnose cornerbead with its proprietary coated steel and a deep knurling (embossing) to give you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our $7 / 8^{\prime \prime}$ flange provides you with extra liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our proprietary steel coating gives our cornerbead a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel. Our wide $7 / 8^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $1 / 2^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## STANDARD 5/8" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

To give you a superior joint compound adhesion and maximum protection for a professionally finished corner, Clinch-On manufactures its $3 / 4^{\prime \prime}$ radius $5 / 8^{\prime \prime}$ standard flange $90^{\circ}$ bullnose cornerbead with its proprietary coated steel and a deep knurling (embossing). Our $5 / 8^{\prime \prime}$ flange provides you with liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our proprietary steel coating gives our cornerbead a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel. Our standard $5 / 8^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## 

## SOFT WHITE WIDE 7/8" 90º BULLNOSE CORNERBEAD WITH 3/4" RADIUS

Clinch-On manufactures its $3 / 4^{\prime \prime}$ radius soft white $7 / 8^{\prime \prime}$ wide flange $90^{\circ}$ bullnose cornerbead with its proprietary coated, primer-painted steel and a deep knurling (embossing). Our primed soft white surface gives our cornerbead a shadow free appearance and superior adhesion qualities. Our soft white wide $7 / 8^{\prime \prime} 90^{\circ}$ bullnose corner bead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## WIDE 7/8" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 1-1/2" RADIUS

For that bold extra wide look, Clinch-On manufactures its $1-1 / 2^{\prime \prime}$ radius $7 / 8^{\prime \prime}$ wide flange $90^{\circ}$ standard angle bullnose cornerbead with its proprietary coated steel and a deep knurling (embossing) to give you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our 7/8" flange provides you with extra liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our proprietary steel coating gives our cornerbead a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel. Our wide $7 / 8^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $1-1 / 2^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## "U" BULLNOSE (DOOR AND WINDOW) TRIM CORNERBEAD WITH 3/4" RADIUS

Clinch-On "U" bullnose cornerbead trim was designed to cap drywall for a professionally finished drywall edge at window and door jambs. Our "U" bullnose trim can be used where drywall abuts plaster, beams, wood, masonry or concrete. Our $1 / 2$ " flange provides you with liberal installation space for nailing, stapling or screwing our cornerbead to drywall. Our proprietary steel coating gives our " U " bullnose trim a dark (dull) appearance and superior adhesion qualities compared to shiny hot dipped galvanized steel.

## PAPER FACED NAIL-ON STANDARD 1-1/4" $90^{\circ}$ SQUARE CORNERBEAD

To give you a superior joint compound adhesion and maximum protection for a professionally finished corner, Clinch-On covers its paper faced nail-on 1-1/4" standard flange $90^{\circ}$ square cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our nose design requires less joint compound. Our 1-1/4" flange provides you with liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our paper faced nail-on standard $1-1 / 4^{\prime \prime} 90^{\circ}$ square cornerbead is designed for $90^{\circ}$ outside corners.

## PAPER FACED NAIL-ON STANDARD 9/16" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

Clinch-On covers its $3 / 4^{\prime \prime}$ radius paper faced nail-on $9 / 16^{\prime \prime}$ standard flange $90^{\circ}$ bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our $3 / 4^{\prime \prime}$ radius paper faced standard flange, standard angle bullnose cornerbead gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our $9 / 16$ " flange provides you with liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our paper faced nail-on standard $9 / 16^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## PAPER FACED NAIL-ON WIDE 7/8" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

To give you a superior joint compound adhesion and maximum protection for a professionally finished corner, Clinch-On covers its 3/4" radius paper faced nail-on 7/8" wide flange standard angle bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our 7/8" flange provides you with extra liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our paper faced nail-on wide $7 / 8^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## PAPER FACED NAIL-ON WIDE 7/8" $135^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

Clinch-On covers its paper faced bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our 3/4" radius paper faced nail-on $7 / 8^{\prime \prime}$ wide flange $135^{\circ}$ open angle bullnose cornerbead gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our 7/8" flange provides you with extra liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our paper faced nail-on wide flange $7 / 8^{\prime \prime} 135^{\circ}$ open angle bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $135^{\circ}$ outside corners.

## PAPER FACED NAIL-ON PUP STANDARD 9/16" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

Our $3 / 4^{"}$ radius PUP paper faced nail-on $9 / 16^{\prime \prime}$ standard flange $90^{\circ}$ bullnose with a $3 / 4^{\prime \prime}$ radius is an economical alternative to our traditional $3 / 4^{\prime \prime}$ radius paper faced nail-on $9 / 16$ " standard flange $90^{\circ}$ standard angle bullnose cornerbead. Our PUP is manufactured with the same uniquely formulated paper, proprietary coated steel and paper-to-steel lamination as other Clinch-On products. To make the PUP an economical alternative, we use a lighter gauge steel. Our 9/16" flange provides you with liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our 3/4" radius PUP paper faced nail-on standard $9 / 16^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## PAPER FACED NAIL-ON WIDE 7/8" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 1-1/2" RADIUS

For that bold extra wide look, Clinch-On manufactures a $1-1 / 2$ " radius paper faced nail-on $7 / 8^{\prime \prime}$ wide flange $90^{\circ}$ bullnose cornerbead. Clinch-On covers its paper faced nail-on bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our $1-1 / 2^{\prime \prime}$ radius paper faced wide flange $90^{\circ}$ bullnose cornerbead gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our 7/8" flange provides you with extra liberal installation space for nailing, stapling, screwing or clinching our cornerbead to drywall. Our paper faced nail-on wide $7 / 8^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $1-1 / 2^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## PAPER FACED TAPE-ON STANDARD 7/8" $90^{\circ}$ SOUARE CORNERBEAD

To give you a superior joint compound adhesion and maximum protection for a professionally finished corner, Clinch-On covers its beaded paper faced tape-on 7/8" standard flange $90^{\circ}$ square cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our nose design requires less joint compound. Our paper faced tape-on standard $7 / 8^{\prime \prime} 90^{\circ}$ square cornerbead is designed for $90^{\circ}$ outside corners.

Clinch-On paper faced tape-on products will increase your installation productivity, decrease your installation labor costs and eliminate your corner crack callbacks - see our warranty on page 3.

## PAPER FACED TAPE-ON STANDARD 5/8" $135^{\circ}$ SQUARE CORNERBEAD

Clinch-On covers its paper faced tape-on $5 / 8^{\prime \prime}$ standard flange $135^{\circ}$ open angle square cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding and gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our nose design requires less joint compound. Our paper faced tape-on standard $5 / 8^{\prime \prime} 135^{\circ}$ square cornerbead is designed for $135^{\circ}$ outside corners.

## PAPER FACED TAPE-ON $3 / 8^{\prime \prime} 90^{\circ}$ SOUARE "STEEL" INSIDE CORNERBEAD

For our inside paper faced tape-on $3 / 8^{\prime \prime}$ flange $90^{\circ}$ square "steel" cornerbead, we use a steel sub-structure and then laminate our specially engineered paper to the steel sub-structure. Our paper-to-steel lamination process eliminates delamination. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. Our inside paper faced tape-on $3 / 8^{\prime \prime} 90^{\circ}$ square cornerbead was designed to give you straight inside corners and form a true $90^{\circ}$ inside corner.

Clinch-On paper faced tape-on products will increase your installation productivity, decrease your installation labor costs and eliminate your corner crack callbacks - see our warranty on page 3.

## PAPER FACED TAPE-ON STANDARD $1 / 4$ " $90^{\circ}$ BULLNOSE CORNERBEAD WITH $1 / 2^{1 " ~ R A D I U S ~}$

For a more conservative narrow look, Clinch-On manufactures a $1 / 2^{\prime \prime}$ radius paper faced tape-on $1 / 4^{\prime \prime}$ standard flange $90^{\circ}$ bullnose cornerbead. Clinch-On covers its paper faced nail-on bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our 1/2" radius paper faced standard flange, standard angle bullnose cornerbead gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our paper faced tape-on standard $1 / 4^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $1 / 2^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## PAPER FACED TAPE-ON "L" SQUARE TRIM CORNERBEAD

Clinch-On paper faced tape-on "L" square cornerbead trim was designed to fulfill two drywall trim needs. First, our "L" square trim was designed for drywall that abuts a suspended ceiling and secondarily it was designed as a reveal for window and door jambs. Our paper faced tape-on "L" square trim can be used where drywall abuts suspended ceilings, plaster, beams, wood, masonry or concrete. Clinch-On manufactures " $L$ " profiles for a wide variety of installation requirements ( $1 / 4$ ", $3 / 8^{\prime \prime}$, $1 / 2^{\prime \prime}, 5 / 8^{\prime \prime}, 3 / 4$ "and $1^{\prime \prime}$ flanges). For superior protection, Clinch-On laminates its specially engineered paper to the Clinch-On proprietary coated steel.

Clinch-On paper faced tape-on products will increase your installation productivity, decrease your installation labor costs and eliminate your corner crack callbacks see our warranty on page 3.

## PAPER FACED TAPE-ON "L" SOUARE TRIM NO BEAD CORNERBEAD

Our no bead paper faced tape-on "L" square cornerbead trim requires minimal joint compound and was designed to fulfill two drywall trim needs. First, our no bead paper faced tape-on "L" square trim was designed for drywall that abuts a suspended ceiling and secondarily it was designed as a reveal for window and door jambs. Our no bead paper faced tape-on " L " square trim can be used where drywall abuts suspended ceilings, plaster, beams, wood, masonry or concrete. Clinch-On manufactures "L" profiles for a wide variety of installation requirements ( $1 / 4^{\prime \prime}, 3 / 8^{\prime \prime}, 1 / 2^{\prime \prime}, 5 / 8^{\prime \prime}, 3 / 4^{\prime \prime}$ and 1 " flanges). For superior protection, Clinch-On laminates its specially engineered paper to the Clinch-On proprietary coated steel.

Clinch-On paper faced tape-on products will increase your installation productivity, decrease your installation labor costs and eliminate your corner crack callbacks see our warranty on page 3.

## PAPER FACED TAPE-ON STANDARD $1 / 4^{4} 90^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

Clinch-On covers its paper faced tape-on $1 / 4^{\prime \prime}$ standard flange $90^{\circ}$ standard angle bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our $3 / 4^{\prime \prime}$ radius paper faced $1 / 4^{\prime \prime}$ standard flange $90^{\circ}$ bullnose cornerbead gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our paper faced tape-on standard $1 / 4^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

Clinch-On paper faced tape-on products will increase your installation productivity, decrease your installation labor costs and eliminate your corner crack callbacks - see our warranty on page 3.

## PAPER FACED TAPE-ON STANDARD 3/16" $135^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

Clinch-On covers its paper faced tape-on $3 / 16^{\prime \prime}$ standard flange $135^{\circ}$ open angle bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding and gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our paper faced tape-on standard $3 / 16^{\prime \prime} 135^{\circ}$ bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $135^{\circ}$ outside corners.

## PAPER FACED TAPE-ON PUP STANDARD 1/4" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 3/4" RADIUS

Our $3 / 4^{\prime \prime}$ radius PUP paper faced tape-on $1 / 4^{\prime \prime}$ standard flange $90^{\circ}$ standard angle bullnose cornerbead is an economical alternative to our traditional $3 / 4^{\prime \prime}$ radius paper faced tape-on $1 / 4^{\prime \prime}$ flange $90^{\circ}$ bullnose cornerbead. Our PUP is manufactured with the same uniquely formulated paper, proprietary coated steel and paper-to-steel lamination as other Clinch-On products. To make the PUP an economical alternative, we use a lighter gauge steel. Our PUP paper faced tape-on standard $1 / 4^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

Clinch-On paper faced tape-on products will increase your installation productivity, decrease your installation labor costs and eliminate your corner crack callbacks - see our warranty on page 3.

## PAPER FACED TAPE-ON WIDE 5/16" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 1-1/2" RADIUS

For that bold extra wide look, Clinch-On manufactures a 1-1/2" radius paper faced tape-on $5 / 16^{\prime \prime}$ wide flange $90^{\circ}$ standard angle bullnose cornerbead. Clinch-On covers its paper faced tape-on wide $5 / 16^{\prime \prime}$ flange $90^{\circ}$ bullnose cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our 1-1/2" radius paper faced wide flange standard angle bullnose cornerbead gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our paper faced tape-on wide $5 / 16^{\prime \prime} 90^{\circ}$ bullnose cornerbead with a $1-1 / 2^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## PAPER FACED TAPE-ON KERF BULLNOSE TRIM CORNERBEAD WITH 1/2" RADIUS

For a more conservative narrow look, Clinch-On manufactures a $1 / 2^{\prime \prime}$ radius $7 / 16^{\prime \prime}$ flange paper faced tape-on kerf bullnose cornerbead trim. Clinch-On covers its paper faced tape-on kerf bullnose trim cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our paper faced tape-on kerf bullnose trim cornerbead with a $1 / 2^{\prime \prime}$ inch radius is designed for $90^{\circ}$ outside corners.

Clinch-On paper faced tape-on products will increase your installation productivity, decrease your installation labor costs and eliminate your corner crack callbacks - see our warranty on page 3.

## PAPER FACED TAPE-ON KERF BULLNOSE TRIM CORNERBEAD WITH 3/4" RADIUS

Clinch-On 3/4" radius 7/16" flange paper faced tape-on kerf bullnose cornerbead trim is easy to install into a kerf cut. Clinch-On covers its paper faced tape-on kerf bullnose trim cornerbead with a specially engineered paper using a paper-to-steel lamination process that eliminates delamination. Our 3/4" radius paper faced tape-on kerf bullnose trim cornerbead gives you a superior joint compound adhesion and maximum protection for a professionally finished corner. Our durable fiber specially engineered paper prevents balling (fuzzing) when sanding. For superior protection, Clinch-On laminates its uniquely formulated paper to the Clinch-On proprietary coated steel. Our paper faced tape-on kerf bullnose trim cornerbead with a $3 / 4^{\prime \prime}$ radius is designed for $90^{\circ}$ outside corners.

## CLINCH-ON INTRODUCES ITS PLASTIC CORNERBEADS \& TRIMS

Clinch-On uses ABS (Acrylonitrile Butadiene Styrene) to manufacture its highly pliable and impact (dent) resistant plastic cornerbead profiles. Clinch-On uses ABS rather than PVC (Polyvinyl Chloride) because a fire will cause PVC to form hydrochloric acid fumes, which are a serious and deadly hazard. ABS is environmentally safer and gives you better mud and paint adhesion, increased flexibility and durability, greater resiliency and improved flange crack resistance from stapling and nailing. Our intricate pattern of holes on the flanges of the cornerbead allows the joint compound to penetrate through the flanges to the drywall and gives you a superior joint compound adhesion.

ABS is a common recyclable thermoplastic with a melting point of approximately $221^{\circ} \mathrm{F}\left(105^{\circ} \mathrm{C}\right)$. The most important mechanical properties of ABS are that is will never rust and is impact resistant. ABS is resistant to aqueous acids, alkalis, concentrated hydrochloric and phosphoric acids, alcohols and animal, vegetable and mineral oils.

## 

## PLASTIC 1-1/4" $90^{\circ}$ SQUARE CORNERBEAD - STANDARD

Clinch-On 1-1/4" flange ABS square cornerbead with wide flanges and numerous perforations provides a liberal space for installation and ensures great joint compound adhesion.

## PLASTIC 1-1/4" $135^{\circ}$ SQUARE CORNERBEAD - STANDARD

Clinch-On 1-1/4" flange $135^{\circ}$ ABS square cornerbead (splay bead) is designed for applications where there is an off angle when two walls meet, commonly called $135^{\circ}$ corners. Wide flanges and numerous perforations provide a liberal space for installation and ensure great joint compound adhesion.

## 

## PLASTIC WIDE 7/8" $90^{\circ}$ BULLNOSE CORNERBEAD WITH 1/2" RADIUS - STANDARD

For a more conservative narrow bullnose look, Clinch-On manufactures a $1 / 2^{\prime \prime}$ radius bullnose cornerbead. Our 1/2" radius ABS plastic bullnose cornerbead gives you superior joint compound adhesion, highly pliable dent resistance and maximum protection for a professionally finished corner. Wide flanges and numerous perforations provide a liberal space for installation and ensure great joint compound adhesion.

## 

## PLASTIC KERF BULLNOSE TRIM CORNERBEAD WITH 3/4" RADIUS - STANDARD

Clinch-On kerf $3 / 4^{\prime \prime}$ radius ABS bullnose standard (straight) is easy to install into a kerf cut door jam. A door way is a high traffic area. Clinch-On therefore, manufactures this product using ABS plastic because of its resistance to impact (dents). Wide flanges and numerous perforations provide a liberal space for installation and ensure great joint compound adhesion.
